Titebond® PROvantage™ Landscape Construction Adhesive is specifically designed for use on pavers, retaining walls, stone, brick, block, wood and most common building materials used in landscaping. The professional strength formula is waterproof and works well in extreme weather conditions to provide a long lasting bond.

**Recommended For**
Installation of landscape materials for retaining walls, capstones, planters and walkways.

**Specifications & Certifications**
Exceeds the requirements of ASTM D3498, APA AFG-01 and ASTM C557.

**Compatible Materials**
Bonds common building materials including brick, stone, concrete, metal, wood, timber and slate.

**PROvantage VOC-Compliant Solvent**
Prevents wall shifting
Extrudes 0°F to 100°F
Wet & frozen lumber
VOC-compliant
Repairs loose brick & stone
All weather
Durable bond
Waterproof
### Technical Information
- **Application Temperature:** 0°F to 100°F
- **Service Temperature:** -20°F to 120°F
- **Working Time:** Approximately 20 minutes for a 1/4” bead

### Physical Properties
- **Type:** Proprietary synthetic polymer
- **State:** Thixotropic medium-viscosity mastic
- **Color:** Beige
- **Solids:** 65%
- **Viscosity:** 130,000 cps
- **VOC:** < 70 g/L
- **Weight/Gallon:** 10.5 lbs.
- **Flashpoint:** < 0°F
- **Freeze/Thaw Stability:** Will not freeze
- **Storage Life:** 18 months in tightly closed containers at 75°F
- **Odor:** Solvent (strong)

### User Tips
Not designed for continuous submersion. Vertical applications must be braced for at least 3 days. When creating structures higher than 3 feet, consult block manufacturer for specific instructions. One surface must be porous. For use on plastics, contact Technical Service.

### Directions
**PREP:** Surfaces must be clean and free of any material that may prevent adequate adhesion.

**APPLICATION:** Cut tip on slant for 1/4” to 3/8” bead. Puncture inner seal and place in cartridge gun. Apply adhesive to one of the surfaces in either a continuous or spot bead. Wet blocks must dry within 48 hours for adhesive to adhere properly. Retaining Wall Caps: Apply 1/4” to 3/8” bead around the perimeter of the underlying block 2” from edge. Press firmly in place to ensure adequate adhesive contact. Landscape Blocks: Apply two 1/4” beads of adhesive, front and back on each block. Press firmly in place to ensure adequate adhesive contact. Apply blocks to adhesive within 20 minutes when temperature is 70°F. If temperature is above 70°F, reduce time to 10 minutes or less. Allow at least 48 to 72 hours before foot traffic and 5 to 7 days for heavy traffic.

**CLEANUP:** Tools and adhesive may be cleaned with acetone or mineral spirits. Follow solvent vendor’s precautions.
